Line accents: Top left of camera and bottom right of Oh Snap!
in Storm

Collect Moments banner: Bottom center in Storm (or Bright White if available).

Flash accent: Top right over camera flash in Storm (or Bright White if available)

Follow these instructions to complete Club Couture™ project.

1. Prepare your board by wiping it clean of any debris or dust.
2. Prepare your Chalk Transfer™ by removing it from the packaging and cut apart the individual elements. Label the backer papers with marker to correspond with the image to expedite cleanup.
3. When you remove the backer from the Transfer screen, be sure to “fuzz” each element to gentle the adhesive by sticking the adhesive screen to a terry cloth towel to pick up a bit of lint before applying it to your board.
4. Position your desired Transfer element and smooth to adhere to your surface, ensuring there are no bubbles.
5. Prepare your Chalkology™ Paste by tearing off corners of the Paste Single packets and squeezing desired amounts onto dish or other palette surface.
6. Use a generous amount of Chalkology™ Paste on the Small Squeegee and smooth it over the Transfer element (see color and placement suggestions above).
7. Once the screen portion of the design is completely covered, squeegee the excess paste off as evenly as possible and scrape unused paste back into the jar or palette. The more excess paste you remove, the better the result.
8. Carefully peel back the Transfer before the paste dries and immediately put it in water to clean thoroughly. Once clean, let dry with sticky-side-up.
9. For best results, wash and dry each Transfer element and the Squeegee before reusing.
10. Repeat these basic techniques as you proceed with each element of your design. Allow sufficient dry time of your surface (or use a hair dryer to speed drying) before layering subsequent steps.
11. Once all the Transfer elements are clean and dry, reapply all backers and store flat.
